Student 1 - Студент 1

This interview was unintentionally a group one, but overall, the feedback was very similar to combine it. Some questions were not asked due to tight schedule of both sides. Time taken for an interview was not enough to exhaustively gather the info. Some important questions had to be collected later via the messenger.

Question(EN/RU)	Student's answer(EN)
Your avg. RQ grade? / Средняя оценка за RQ?	P-
How your expected grade differs from received? / Как отличается твоя личная оценка от получаемой?	My personal assessment is P usually.
What TA comments do you get most often? / Какие комментарии TA встречаешь чаще всего?	"Why? "Source? "Define".
Do you often agree/disagree with TA comments? / Как часто ты соглашаешься/не соглашаешься с комментариями TA?	I always think that everything is logical and coherent, that cause-and-effect is clear. What should I even source?
What's the most difficult in RQ? / Что самое сложное при написании RQ?	Prev.question + I can't see the domain lingvo used by me. I can't write answers as if I'm explaining to a grade schooler.
What's the easiest? / А что проще всего?	-
How would you change current grading/requirements? Как бы ты изменил(а) текущую систему оценивания/требований?	I think it's wrong to grade a correct answer with 0 if it has no references.
Do you use upgrades and why? Пользуешься ли апгрейдами и почему?	Of course. Usually upgrade from P- to P.
What value do TA comments provide to you? Чем для тебя полезны комментарии TA?	I don't understand them. Too uninformative.
How often do you provide examples? Как часто ты приводишь примеры?	Rarely. Only if asked. I often get comments like the examples are irrelevant. In grade-P answer incorrect example could ruin it to P-.
How do you indicate your examples? Как ты обозначаешь свои примеры?	-
How long does the formatting take? Сколько времени занимает форматирование?	Almost none. I made the first template document and just use it. Same work but with fancy formatting is graded higher.
How long does the referencing take? Сколько времени занимают цитирования?	[Our feature of references count check was explicitly asked for.]
